U. S. Wanta Million Flannel Shirts

Special Despatch to The Sun.

t. S. Wants Million Flannel Shirts

Special Despatch to Tax Sus.

Washington, June 29.—Clothing for the uniformed forces is needed in large quantities by the Government. For the week beginning July 1 the supply division of the Quartermaster's Department has announced many items, notable among which is a million flannel shirts, which are urgently needed. Half a million pairs of denim trousers and as many denim coats are on the list. Of barrack hags the Government is in the market for 250,000 and bids on a like number of bed sacks are asked.

In materials the requirement for duck has fallen off about 50 per cent. since last week, the amount called for in next week's list, in all weights and widths, being 3,312,700 yards. The Government is also in the market for 250,000 yards of collar canvas and 43,750 yards of collar canvas and 43,750 yards of collar canvas and 43,750 yards of sanyas padding. There is a demand also for 149,500 pillow cases and 243,000 sheets.

Don't Want National Trademark. The bales are banded with not less than four bands of cold rolled unannealed steel placed so as to hold the compression. Burlap over waterproofed heavy paper is used to cover the bales and there are two "ears" on each end of the bale for easy handling.

Because so many women are employed as stevedores in France, there is a law in that country that these women shall not be compelled to extra which the solution is not necessary, as the origin and not be compelled to carry packages weighing more than seventy pounds. This law has compelled the introduction of methods to standardize packages shipped to the American expeditionary force so that they shall not weigh more than seventy pounds for handling by one woman carrier, nor more than 140 pounds for handling by two women carriers.

Merchandise that cannot be conveniently of sex and these heavier packages are handled by men at the docks.

It is estimated that every inch saved by compression is worth and the property of the sex and the seventy pounds for goods would merely serve to injure the standing of all other American made goods.

Of course this objection could be overome if a national regulation as to the quality of goods exported from the property of the compelled to carry packages are concerned the as ranged; Automobiles Traded, Cadillacs; Landaulettes, Limousines, \$450 to \$1750.
